The first tree to leaf out in the spring. The first tree to bloom. Fragrant trusses of pure white bloom completely cover the entire plant in late April or early May. Bloom clusters resemble the Lilac in shape and are lovely for cutting. Let this wonderful tree provide you with the first bouquets of the season. BEAUTIFUL HYDRANGEAS

PANICULATA GRANDIFLORA. Flowers in August with huge panicles, measuring from 8 to 12 inches long. Blossoms are first a delicate shade of pink gradually changing to bronze in early autumn.

ARBORESCENS GRANDIFLORA (Snowball Hydrangea). Has the appearance of a low-growing snowball. White, clustered flowers appear in June and July, lasting for weeks. Very hardy and does well in shady locations.

OAK-LEAVED HYDRANGEA. A truly marvelous bushy shrub. Flowers in large creamy clusters. The dark green foliage has silvery sheen on under side and turns to a glowing red in the fall. Grows to a height of 4 or 5 feet, and is very effective as an ornamental shrub. Does well in shady locations. 50c each; 3 for \$1.25, postpaid.

Hydrangea P. G.

French Pussy Willow

A small treelike shrub with attractive leaves 2 inches long and an inch wide. It's popular appeal is the conspicuous silky catkins which bud in the fall, and make those "spring" bouquets just as the snow melts in the spring.

Tamarix Africana

These large shrubs have foliage resembling asparagus leaves, with a drooping, feathery appearance. Bear delicate pink flowers in great profusion in early summer. Does well in any type of soil.

Bush Honeysuckle

For a tall hedge or to screen an unsightly view there is no shrub so valuable. Will grow to the height of 10 to 12 feet in a few years. A beautiful shrub both summer and winter. Is the first to cloth itself with leaves in the spring, and its fragrant flowers and luxuriant foliage are a constant delight. Bright red berries cling to the bush all through the winter, giving a brilliant touch of color to the winter landscape.

Amelanchier Canadensis

A dwarf bushy tree which becomes a cloud of snowy white bloom in early spring. In June it is loaded with delicious, edible fruit. If you want a plant for both ornamental and practical purposes get a few of these. Hardy and a rapid grower.

MOCK ORANGE

VIRGINAL. Blooms throughout the season. This wonderful Mock Orange is without question one of the most beautiful of the shrubs. Single flowers on one year wood; double flowers on two year wood. Grows 6 to 8 feet in height and is a valuable addition to any shrub group.

CORONARIUS. Sweet-Scented Mock Orange. A tall vigorous bush with abundant dark green foliage and single blooms having a sweet fragrance. Fine for cutting.

ALTHEA - Rose of Sharon

Tall, beautiful flowering shrubs, distinctive because of their blooms. Double flowers resemble roses with tightly curved petals. Color shades stand out vividly in group plantings or as specimens. Very worth-while plant to buy, as they are easily grown, unusually hardy and bloom long and lavishly. Note: The Altheas are very late in leafing out in the spring. Do not be alarmed if they stand dormant up into June.

We offer 5 distinct and beautiful colors: Vivid Red, Pink, White, Blue, and Variegated. Your choice at 35c each or 5 for \$1.50, postpaid.

Deutzia, Pride of Rochester

Russian Olive

Useful in mixed groups for color contrast. Bark on branches is dark green, foliage is a light silvery shade. Golden yellow blooms are followed by ornamental olive fruits. Grows 12 to 16 feet in height.

Red-Leaved Barberry

This brilliant barberry is becoming more and more popular every year. Bronze-red leaves during the summer turn to fiery red in fall. Red barberry should be planted in full sun for best color results. For hedging sizes see page 7. 35c each; 3 for \$1.00, postpaid.

Green-Leaved Barberry

No shrub is so generally planted or has so many practical uses as Japanese Barberry. It hasn't a single fault, and can be grown in shade, dry, moist or sunny locations. When grown as specimen plants or as an edging to taller shrubs, its graceful arching branches, covered with luxuriant green foliage in summer and flashing red berries in winter, make a most pleasing sight. 25c ea., 4 for \$1.00, postpaid.

New Golden Spirea

A beautiful shrub with bright yellow leaves which turn to golden bronze in the fall. White blossoms followed by brilliant fruits. A sturdy, upright grower and valuable for color contrast.

Very hardy and free flowering. Masses of globular scarlet berries remain through the winter, making a striking contrast to the snow.

Snowberries

WHITE SNOWBERRY. Diminutive rose-colored flowers and clustered milk-white fruits which remain far into the winter. Bush is compact in form with numerous slender branches. Can be used in small groups or large masses. Due to its dwarf habit it is valuable for foregrounds in shrub plantings. Excellent for shade.

NEW RED SNOWBERRY. This is the greatest shrub for shady places that we have ever seen. Grows to a height of 5 feet with gracefully arching branches and lacy foliage. Blooms are followed in fall by glowing berries, twice the size of the old Indian Currant and as red as those of the High-Bush Cranberry. Don't fail to get some of these shrubs for shady locations.
